

The market of continuous glucose monitoring systems has a high growth potential!

MLC commissioned a market research on **CGM** application in the world, as well as an analysis of the prospects and development of the market by **MegaResearch**, a leading marketing agency in Russia.

The potential market volume is **16.7 billion** units. The actual sales volume of **CGM systems** is **0.5%** of the potential one.

Experts forecast an average annual growth in consumption of **CGM** devices to be **15%**.

By 2045, the market will grow from 98.6 to **2,343.4 million** devices per year (23.8 times), which will be equivalent to the growth from USD 10,953.3 million to **USD 233,127.7 million** (21.3 times). At the same time, the supply of devices will amount to **11.5%** of the total number of diabetic patients.

Invest in real high-tech production!

MedTech innovation in real production

About the project

MLC – is a high-tech project in the **MedTech** field launching its first contract manufacturing line in China for its in-house patented **CGM** (Continuous Glucose Monitoring) system.

Intellectual property valuation

A series of patents have been obtained for the technology applied in the **CGM** system.

Applications for international patents have been filed in **59** more countries

According to the independent expert assessment commissioned by **MLC**, the cost of the project's IP amounts to **\$ 108 million**.

Intellectual property is the backbone of capitalization and long-term sustainability of the **MLC** business.

Implementation plan for the first contract manufacturing line in China

Entering into agreements with contractors

Production start for a test batch (**10,000** units)

Certification launch

Launching the mobile application

Production quality control

Reaching planned production capacity

Business plan

Planned financial metrics of production setup **CGM** systems in the **MLC** project, calculated by **MegaResearch** marketing agency.

Production plan: **40** million units in 2030.

NPV, \$ thousand: **2,704,581** in 2030.

EBITDA: **1,298,433** in 2030.

The calculations made indicate that the project becomes profitable starting from the second year of its implementation.

The project's profitability index (PI) is **6,762.45** units.

The internal rate of return (IRR) in the project is **546.3%**.

The profitability of sales in the accruing period is calculated at **50%** for 2030.

The world global community of the MLC project

National representatives in the following countries:

Vietnam

Côte d'Ivoire

India

Cameroon

France

Burkina Faso

Algeria

Haiti

Morocco

Benin

Switzerland

The number of partners supporting the project is growing on a daily basis!

The humanitarian mission of the project is clear and resonates with every person!
